Eco-friendly Products/Super Eco-friendly Products

The Nikon Group formulated Nikon Product Assessment in 1995 for carrying out assessments that thoroughly consider the characteristics of Nikon products and their environmental impact; since then, Nikon Product Assessment has been applied to all newly-developed products.

In the past, all products that had been developed by implementing product assessment were classed as eco-friendly products. However, we reviewed these definition and systems, and starting from fiscal year 2017, we established a new system whereby those products that conform to more rigorous standards in product assessment are classed as either Eco-friendly Products or Super Eco-friendly Products. Along with this, Nikon has created its own unique symbol marks (Eco-friendly Products and Super Eco-friendly Products).

Super Eco-friendly Products mark

Eco-friendly Products mark

- A) The above symbol marks are used only for Nikon products recognized as eco-friendly products based on our own standards of environmental consideration.
- B) The above symbol marks are not affiliated with any other environmental organizations.

Eco-friendly Products System
